**In the Claims:**

Claims 1- 40 (canceled)

Claim 41 (new): An identifier registration method comprising:

selecting at least two registerable naming systems from a group of registerable naming systems including a domain name system, a top level domain alias naming system, a multilingual naming system, a fictitious identifier naming system, a trademark naming system, a keyword naming system, a telephone number naming system, a username naming system, an account name naming system, a product code naming system, a book number naming system, a catalog identifier naming system, a document identifier naming system, an intellectual property identifier naming system, a manufacturer identifier naming system, a merchant/reseller/affiliate code naming system, an image naming system, a geographic naming system, a classification naming system, and a license plate identifier naming system;

at least one of a receiving and generating one or more identifiers either, before, during or after said selecting said at least two registerable naming systems, said one or more identifiers having a capability of being registered in said at least two registerable naming systems; and,

providing a user with an ability to determine whether said one or more identifiers is available for registration in said at least two registerable naming systems.

Claim 42 (new): The method, as set forth in claim 41, wherein said at least one of a receiving and generating said one or more identifiers includes at least one of a receiving and generating a plurality of identifiers including at least a first identifier corresponding to a first naming system selected from said group of registerable naming systems and a second identifier corresponding to a second naming system selected from said group of registerable naming systems.

Claim 43 (new): The method, as set forth in claim 42, wherein said first identifier and said second identifier are the same identifier or said first identifier and said second identifier are similar identifiers.

Claim 44 (new): The method, as set forth in claim 42, wherein said first identifier includes a portion of said second identifier or said second identifier includes a portion of said first identifier.

Claim 45 (new): The method, as set forth in claim 42, wherein said generating said one or more

identifiers includes generating said one or more identifiers from said first identifier.

Claim 46 (new): The method, as set forth in claim 41, wherein said generating said one or more identifiers includes generating at least one identifier by consulting from at least one of a word generation method, dictionary, thesaurus, prefix, suffix, word root, word stem, set of heuristic naming rules, namespace syntax, identifier equivalent, language translation, phonetic spelling, phonemes, identifier watch list, list of desirable descriptors, personal identifier portfolio, competitor identifier portfolio, mnemonic method, abbreviation, namespace mapping, identifier mapping, delimiter mapping, rhyming method, name-to-number conversion, number-to-name conversion, and identifier history.

Claim 47 (new): The method, as set forth in claim 41, further including determining whether said one or more identifiers is available for registration in at least one naming system selected from said group of registerable naming systems.

Claim 48 (new): The method, as set forth in claim 47, wherein said determining whether said one or more identifiers is available for registration includes comparing said one or more identifiers to a metaregistry.

Claim 49 (new): The method, as set forth in claim 47, further including registering at least one identifier that is determined available for registration.

Claim 50 (new): The method, as set forth in claim 49, wherein said registering said at least one identifier that is determined available for registration includes registering said at least one available identifier through an identifier registration interface.

Claim 51 (new): The method, as set forth in claim 42, further including at least one of a selecting at least one of a first identifier and second identifier from said one or more identifiers and selecting at least one of a first registerable naming system and second registerable naming system from said group of registerable naming systems.

Claim 52 (new): The method, as set forth in claim 51, further including generating a second identifier

in response to selecting said first identifier.

Claim 53 (new): The method, as set forth in claim 51, further including at least one of a concurrently selecting from said first naming system and said second naming system, concurrently selecting from said first identifier and said second identifier, concurrently determining whether said first identifier and said second identifier is available for registration, and concurrently registering said first identifier and said second identifier.

Claim 54 (new): The method, as set forth in claim 53, further including allocating said first identifier when it is determined that said first identifier is available for registration and determining whether said second identifier is available for registration further includes determining whether said second identifier is available for registration while said first identifier is allocated.

Claim 55 (new): The method, as set forth in Claim 41, wherein each identifier of said one or more identifiers is one of a valid domain name, fictitious domain name, TLDA name, multilingual domain name, phone number, keyword, search term, RealName, Network, Internet keyword, AOL keyword, Publisher Item Identifier (PII), Digital Object Identifier (DOI), Inter Deposit Digital Number (IDDN), International Standard Book Number (ISBN), International Standard Technical Report Number (ISRN), International Standard Serial Number (ISSN), Serial Item and Contribution Identifier (SICI), Book Item and Component Identifier (BICI), European Article Number (EAN), Universal Product Code (UPC), Standard Address Number (SAN), International Standard Audiovisual Number (ISAN), International Standard Work Code (ISWC), International Standard Music Number (ISMN), International Standard Recording Code (ISRC), Intellectual Property Identification (IPI), Uniform File Identifier (UFI), Uniform Resource Identifier (URI), Persistent Uniform Resource Locator (PURL), Universally Unique Identifier (UUID), Globally Unique Identifier (GUID), Namespace Identifier (NID), Bank Identification Number (BIN), Personal Identification Number (PIN), Mod 10 Number, credit card number, Electronic Serial Number (ESN), Mobile Identification Number (MIN), Automatic Number Identification (ANI), Social Security Number (SSN), Employer Identification Number (EIN), Taxpayer Identification Number (TIN), Vehicle Identification Number (VIN), World manufacturer identifier (WMI), Manufacturer Identification Number (MIN), Market Identifier Code (MIC), Standard Industrial Classification (SIC), Standard Occupational Classification (SOC), Stock Keeping Unit number (SKU), International Business Entity Identifier (IBEI), Institution Identification Code (IIC),

National Provider Identifier (NPI), Dunn and Bradstreet Number (DUNS), SEC file number, patent number, trademark number, serial number, charter number, policy number, certification number, document identifier, reference number, invoice number, transaction identifier, validation code, account number, merchant code, reseller code, affiliate code, authorization code, network identifier, user identifier, PGP key, digital certificate, driver license number, license plate number, trademark, servicemark, tradename, fictitious name, company name, DBA, AKA, stock symbol, station identifier, broadcast station call letters, ham radio call letters, broadcast frequency number, street name, street address, ZIP code, IP address, host, e-mail address, ICQ number, nickname, screen name, username, alias, handle, document title, book title, song title, movie title, phrase, slogan, machine readable code, glyph, image, icon, animation, sequence of musical notes, date, time, name, abbreviation, mnemonic, moniker, label, alphanumeric, string, character, symbol, token, integer, and number.

Claim 56 (new): The method, as set forth in claim 41, wherein said providing the user with the ability to determine whether each said generated identifier is available for registration includes one of a providing at least one hyperlink adapted to access an identifier registration service and automatically determining whether each said generated identifier is available for registration.

Claim 57 (new): An identifier registration method comprising:

a user logging in to an account with a first identifier, said first identifier corresponding to account information;

generating one or more identifiers corresponding to at least one of a first identifier and account information in response to the user said logging in, said one or more identifiers having a capability of being registered in one or more registerable naming systems; and,

providing the user with an ability to determine whether at least one said generated identifier is available for registration in at least one said one or more registerable naming systems.

Claim 58 (new): The method, as set forth in claim 57, wherein said at least one of a first identifier and account information includes at least one of a username, screen name, handle, login ID, uniform resource identifier, first name, last name, street address, domain name, e-mail address, and telephone number.

Claim 59 (new): The method, as set forth in claim 57, wherein said providing the user with the ability

to determine whether said at least one said generated identifier is available for registration includes one of a providing at least one hyperlink adapted to access an identifier registration service and automatically determining whether said at least one said generated identifier is available for registration.

**Claim 60 (new):** An identifier registration method comprising:

identifying one of a caller and callee from a first identifier, said first identifier corresponding to account information;

generating one or more identifiers corresponding to at least one of a first identifier and account information in response to said identifying said one of a caller and callee, said one or more identifiers having a capability of being registered in one or more registerable naming systems; and,

providing said one of a caller and callee with an ability to determine whether at least one said generated identifier is available for registration in at least one said one or more registerable naming systems.
